

## VID450 *License Scanner*

### OVERVIEW

The VID450 Driver's License/Business Card Scanner is easy to use and provides the user with an image of the ID card and the relevant text information in the appropriate database fields. Its compact footprint is perfect for any reception desk or office environment. The scanning process allows the user to chain-feed the items, while the image processing is done automatically in the background, resulting in a superb scan time of 3 seconds per card. When used with the Vanderbilt Industries SMS Guest Pass visitor management system, drivers licenses can be scanned into the database allowing for quick processing of visitors to a facility.

### FEATURES AND BENEFITS

- Reduces human error by automating the archiving process
- USB Port – no additional power supply needed
- 2-3 seconds scan time per side
- Capable of scanning photographs, business cards, ID cards, plastic credit cards with embossed letters
